History of corner establishment since Original Government Survey

William C. Jung was here in May of 1978 and set a 3/4"x24" round iron bar as a survey point. His notes indicate that more measurements were needed to the East and North to verify this corner.

Description of corner evidence found:

I found Mr. Jung's 3/4" round iron bar and made measurements to the West, North and East. These measurements show no consistent pattern as to direction or distance. I accepted Mr. Jung's iron bar which is in the centerline of a Town Road / Driveway and on line with fences from the West, North and East, as the best available evidence.
