

21503332000

I, William C. Jung, do hereby certify that on the 22nd day of December 1981, I found ~~(evidence)~~ (no evidence) of the East 1/4 corner of Section 33, T 15 N, R 3 W Fourth Principal Meridian, and I re-established said corner according to the Wisconsin Statutes as shown and described hereon.

History of corner establishment since Original Government Survey

Schroeder (or Kenyon?) found this corner to still be existing in November of 1893.

Dated this 24th day of Dec. 1981.

William C. Jung

Registered Land Surveyor 1323

Title

*William C. Jung*

Description of corner and witness monuments, references and accessories used to perpetuate the original or re-established location of this corner:

Description of corner evidence found: The field evidence I found indicated that the fence corner was too far South. At the C/4 I found an old fence corner. The evidence I found every "forty" along the occupied North-South 1/4 line indeed showed that this line had to have been surveyed although no such survey was never recorded. Therefore I force-closed a line between the West 1/4 corner and occupied C/4 corner, and projected this line East until it intersected the occupied East line of the SE/4 of Section 33. The occupied East line of Section 33 is basically very straight and fits the final computed bearing very well. With my final line, there is only a 3 or-4 minute bend at the East 1/4 corner. My distance North to the section corner is about 2657'. The old forty corner appears to be about 1332'± South of the NE corner of Section 33. This fits very well the computed 1/8 corner which would be at 1328'±. My distance South from the E/4 corner to the SE section corner is short (2610.28'), but this is understandable since the terrain along the East line of the SE/4 is very rough.

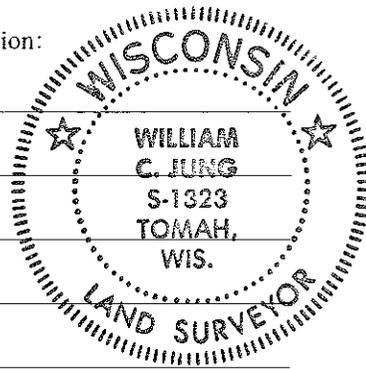

(NOTE: No Other Ties Near)
