## **Filing For a Conditional Use Permit for a Non-Metallic Mine**

1. Submit a completed Application for Special/Conditional Use to the Zoning Office at the address listed below. **An incomplete application will not be processed.**  
Monroe County Zoning Dept.  
14345 Co Hwy B, Suite 5  
Sparta, WI 54656
2. The deadline for application submittal will be at least 30 days from the next Zoning Committee meeting date. **Check with the Zoning Office for this deadline.** The phone number is 269-8736.
3. The application must be signed by the property owner as well as the applicant or applicants' agent of the proposed mining operation. Please use additional application pages for any additional property owners. **Original signatures required.** No copies, faxes or emails will be accepted.
4. Please include 10 hard copies and a digital copy of the information required below:
  - a. Name and contact information of the following:
    - i. The Operator of the proposed mine.
    - ii. Person responsible for preparing the application.
  - b. Detailed Operation Plan: Operations plans should include but are not limited to the following:
    - i. Approximate timeline for extraction/reclamation areas
    - ii. Hours and days of operation
    - iii. Proposed method of extraction/processing
    - iv. Estimated volume of materials to be extracted
    - v. Estimated depth of excavation
    - vi. Estimated depth to groundwater
    - vii. Water requirements for operation functions
    - viii. List of chemicals used for mining operations or stored on site
    - ix. Dust control measures
    - x. Erosion control measures for construction and during operations
    - xi. Noise control measures
    - xii. Light pollution control measures
  - c. Maps including the following:
    - i. Aerial map showing overall boundary of property.
    - ii. Overview map extending 1 mile from the boundary showing location of residential structures and wells.
    - iii. Detailed Site map showing location of the following:
      - 1) Wetland, Shoreland & Floodplain boundaries
      - 2) Proposed excavation areas
      - 3) Operations and processing areas
      - 4) Internal roads
      - 5) Existing and proposed structures
      - 6) Loading & unloading areas
      - 7) Material storage piles
      - 8) Water settling ponds
      - 9) Water supply sources

10) Sanitation Facilities

- iv. Hauling route over County & Town roads for construction and during operations.

Maps should be on paper **NO greater than 11" x 17"**. Larger maps will be accepted for use at the public hearing but only if they are an enlarged duplicate of a map(s) included in the application.

5. The fee is \$200.00. Please make checks it out to Monroe County Zoning Department.
6. A letter from the Zoning Office will be mailed to the applicant's address notifying you of the meeting date along with a copy of the legal notice. This letter will also remind you to contact your Town Board. The Zoning Department will notify the Town of this hearing and send a packet of the requested information you provided with the application. You will then be expected to appear at the Town meeting and explain your proposal.
7. You or your agent will be expected to appear at the Public Hearing in front of the Zoning Committee on the date specified. You will again be expected to explain your proposal and answer questions from the Committee as well as any one else who might appear at the Public Hearing with questions.
8. **The Applicant is required to notify all adjoining landowners within one mile of the upcoming public hearing.**

After the Public Hearing you will be formally notified as to the outcome. If your application has been approved the permit will be mailed to you with your notification. Your formal notification will also state that the Town now has 21 days to disapprove your Conditional Use Permit. If the Town has not done so within that time, you may proceed with your Conditional Use.

**This whole procedure can take approximately 2 months, more or less,  
from the time you first apply.**

For more information, please contact the Monroe County Zoning Office at 269-8736.

8) See Map 1

9) Water will come from the washing operation (which is off site) to assist in moving the sand through the pipe. The water will be separated from the sand, flow into a settling pond, and then be pumped back to the washing operation.

10) Will be in dry plant facility

IV. See Comment Sheet.

## COMMENT SHEET

1. Asking for transload site, rail and trucks. At site #3 & #4 only (24/7/365).
2. Asking for dry plant site for dry plant, at site #3 & #4 only (24/7/365).
3. Asking to install a pipeline to carry water and sand across site #1, #2, #3, & #4 (24/7/365).
4. Asking for a non-metallic mineral mining excavation permit. Site #1 only (24/7/365).
5. Asking to truck on Grover from Gypsum to Highway 12, (16/7/365). No limitation on the number of trucks.
6. Asking to truck Grover from Highway 12, going south, approximately 3000 feet, (24/7/365). No limitation on the number of trucks.

## OTHER COMMENTS

1. There will be no mining (removal) of any Bluffs.
2. There will be no mining at site #2, #3, & #4.
3. Trucking will be as needed by demand of market and location. Our full intension is to use pipeline to carry sand to dry plant and remove sand by rail, which will minimize trucking.

PROPERTY OWNER AUTHORIZATION

I, Brent Stello on behalf of myself and my wife Heather M. Stello, make this statement in connection with the application for a conditional use permit ("CUP") submitted by Wildcat Bluff Cranberry LLC ("Wildcat Bluff Cranberry") to construct and operate a non-metallic mine and related facilities in the Town of Oakdale.

My Wife and I are the owners of the following parcel ("Stello Parcel"), which is the subject of Wildcat Bluff Cranberry's CUP application and is identified by the following tax parcel identification numbers:

Re: Proposed Slurry Pipeline

Dear Mr. Schiebelbein,

This letter confirms our awareness of Reservoir Silicates desire to design and construct slurry pumps and pipelines to transport dredged washed material from your frac sand mine to a location west of US 12 near Grover Road. From the information shared, the proposed pipeline would be installed under Interstate 90/94 and US 12. In addition to the slurry pipeline, you have also proposed work on US 12 and Grover Road.

The Department will need additional information prior to us reviewing and approving the proposed work. We will need the exact location of where the pipeline will be located under the Interstate and US 12 and the proposed roadway work. The proposed roadway work will also need a traffic impact analysis to determine the impacts the traffic generated by the development will have on the highway system. This will determine if the existing highway can accommodate the additional traffic or whether improvements will be required.

In addition to WisDOT's review and approval, Federal Highways will have their own requirements for the pipeline before it is permitted to be allowed within the Interstate right-of-way. Moving forward with your proposal, please provide the location of the pipeline and all changes you are proposing for the roadways at your earliest convenience. We will provide review of those documents and comment on the next steps.

If you have any questions, please feel free to contact me at (608) 785-9075 or email at [stephen.flottmeyer@dot.wiscnhs.gov](mailto:stephen.flottmeyer@dot.wiscnhs.gov).

Sincerely,

Steve Flottmeyer, P.E.

Dear Mike:

**RE: Slurry pipeline Installation crossing underneath CP Rail mainline – Letter of support**

On behalf of Canadian Pacific ("CP"), please accept this letter of support to Reservoir Silicates LP ("RSLP") in their application for installing a sand/water slurry pipeline underneath a CP rail mainline.

RSLP is in development of a frac sand mine approximately 4 miles northwest of Camp Douglas, Wisconsin. The anticipated dredge mining operation transports mined material to a wash facility by use of highly efficient slurry pumps and pipelines where the washed material is then transported again by pipeline to the final production stages at the drying and rail loading facility. The mine and wash facilities are located north of the CP mainline and the dry and rail loading facilities are located south of the mainline. RSLP is designing a portion of the slurry pipeline circuit to be installed underneath the CP mainline as a more efficient and safer means of transporting the washed material for drying, storage and railcar loading where ultimately the finished product can be delivered by CP operated trains to various end markets. See attached map 1-1.

CP will require RSLP to sign CP's standard underground crossing agreement, with appropriate liability and insurance provisions, follow all engineering guidelines and obtain any permits required by local, state and federal governments. CP is in support of this safer design as it is an efficient method of moving mined and washed material to produce frac sand. It also reduces a significant amount of truck traffic to and from the wash and rail facilities.

If you require more information about Canadian Pacific, please contact us via [www.cpr.ca](http://www.cpr.ca), 1-888-333-6370, or directly using the contact information below.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Will Wangerin', is written over a horizontal line.
